EXPERIENCE

Om Softwares

Aug 2025 – Jan 2026

Frontend Developer Intern

Remote

- Engineered **15+ reusable and scalable UI components** using **Next.js**, ensuring 100% design consistency across production-grade web applications.
- Collaborated with backend teams to integrate **10+ REST APIs**, improving data flow efficiency and streamlining frontend-backend coordination for high-traffic modules.

Finsol Consultancy Pvt. Ltd.

Apr 2024 – May 2024

Frontend Developer Trainee

Visakhapatnam, India

- Developed a fully responsive hospital management website utilizing **React.js** and **Tailwind CSS**, achieving a **98% mobile responsiveness score**.
- Enhanced user experience (UX) through optimized client-side routing and UI transitions, reducing page load times by **30%**.

PROJECTS

AI SaaS Image Background Remover | *React, Node.js, Express, MongoDB, JWT* | [Live Demo](#)

- Built a full-stack SaaS platform featuring secure **JWT-based authentication** and cloud image processing for **200+ active users**.
- Architected REST APIs to handle **50+ concurrent AI processing requests** with seamless secure file downloads.
- Optimized **MongoDB queries by 25%** and implemented a modular backend structure for high scalability.

Production-Ready REST API Platform | *Node.js, Express.js, PostgreSQL, Docker, CI/CD*

- Built a production-ready REST API using **Express 5** with modular ES6 architecture and **Drizzle ORM** for 100% type-safe database operations.
- Implemented security features including JWT, bcrypt, and **Zod validation**, managing **100+ requests per minute** with rate limiting.
- Delivered a fully automated DevOps pipeline with **Jest/Supertest** and **GitHub Actions**, ensuring **95% code quality** via ESLint and Prettier.

AI-Powered Personal Automation Assistant | *n8n, Google Calendar API, Google Tasks API*

- Designed and deployed an **agentic workflow automation system** using **n8n** to manage scheduling and task creation.
- Integrated **Google Calendar** and **Google Tasks APIs** to enable real-time event creation and task orchestration.
- Built webhook-triggered workflows supporting **natural language inputs** for automated scheduling, reducing manual management effort via conditional logic.

AI-Powered Document Extraction | *Next.js, FastAPI, Gemini 2.5 Flash, SQLite* | [Live Demo](#)

- Engineered an **end-to-end document processing engine** using FastAPI, [Google Gemini 2.5 Flash](#), **multimodal LLM prompts**, and **Pydantic schemas** to classify and extract structured data from Aadhaar, PAN, and Passport documents with **per-field confidence scoring**.
- Architected a high-concurrency document **extraction pipeline** using **Python asyncio** and semaphores to handle up to 5 concurrent tasks (**approx 50 docs/min**), incorporating retry mechanisms with **exponential backoff** for resilient API processing.
- Developed a responsive Next.js 14 dashboard with a glassmorphism UI, integrating **Server-Sent Events (SSE)** for real-time status streaming, inline editing of extracted records, and SQLite for **persistent data storage**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS, Redux

Backend: Node.js, Express.js, REST APIs, JWT Authentication, FastAPI

Databases: MongoDB, PostgreSQL, SQLite

Core Concepts: Operating Systems, Database Management Systems (DBMS), Computer Networking, Data Structures & Algorithms

Tools & Technologies: Git, GitHub, Postman, CI/CD, Jest, Docker, n8n, Workflow Automation, Linux

AI/ML: Scikit-learn, NumPy, Pandas

ACHIEVEMENTS & CERTIFICATIONS

LeetCode: 500+ Problems Solved (Max Rating: 1555)

CodeChef: 2-Star Coder (Rating: 1445)

Certifications: Python Essentials (Cisco), SQL Basics (HackerRank), Networking Essentials (Cisco)
